

ActivePython Enterprise

ActivePython Enterprise

Focus on core competencies and enjoy peace of mind with on-demand support.

ActivePython Enterprise is a comprehensive software, support and maintenance package for organizations of all sizes that depend on Python. Safeguard your company's applications with guaranteed, quality-assured ActivePython binaries and mitigate risk with world-class support for your critical Python systems.

Why ActivePython Enterprise?

- ▶ Improve developer productivity
- ▶ Speed up development projects to deliver on time and on budget
- ▶ Focus on core competencies
- ▶ Mitigate risk and prevent legal exposure
- ▶ Get expert advice and support on demand
- ▶ Deploy code with confidence

Major Features

Stable, Up-to-date, Secure Binaries and Key Modules

Guaranteed ActivePython binaries and key modules eliminate the need to build, test and maintain your own Python distribution. Your customized ActivePython Enterprise distribution is fully tested and quality-assured by core Python developers, addressing module-level dependencies and eliminating potential licensing issues for fast, worry-free deployment.

Regular Updates and Maintenance

Regular maintenance and quarterly updates guarantee that you are always working with the latest and most secure release. Our in-house Python experts both monitor and contribute to core development, testing new modules for security, stability and quality before inclusion in ActivePython Enterprise.

Technical Support

Add our expertise to your development team at a fraction of the cost of hiring staff and receive on-demand technical support from the industry leader. ActivePython Enterprise ensures priority access to our on-staff core Python developers, and includes unlimited incidents, around-the-clock access, fast response times, and fixes quickly delivered to you electronically. From development troubleshooting to emergency in-production coverage, our in-house experts are a call or email away and can offer design consultation and best practices advice.

Multi-Platform Support

ActivePython Enterprise is available for AIX, Solaris, HP-UX, Windows, Linux and Mac OS X, including 32-bit and 64-bit variants. You can rely on quality assurance and prompt technical support no matter what environment you depend upon.

Confidence and Assurance with IP Indemnification

Protect your organization from legal exposure. Organizations concerned with potential infringement claims from using open source languages can rest assured with optional indemnification coverage for intellectual property. ActiveState stands behind the compliance of our Enterprise distributions, offering you peace of mind and the assurance you need to focus on your business.

Industry-Leading Expertise

ActiveState has been a recognized leader in the Python community since 2000. Virtually all Fortune 2000 companies and two million developers rely on ActiveState's technology for Perl, Tcl and Python.

“ ActiveState's communication, response times and customer support are outstanding compared to other companies. Thanks a lot for the good work. ”

—Lorenz Pelzer, Siemens

“ ActivePython is the solution. Python has long had the Py2Exe module available, and ActivePython comes with a set of nice tools to help you develop, test, and deploy your Python project, be it as a script, zip, or .exe file. ”

—Nate Dickson, Coals[2] Newcastle

Redistributing ActivePython with Hassle-free Enterprise OEM Licensing

Count on trusted and cost-effective Enterprise OEM licensing which provides you full redistribution rights, plus optional support and co-marketing packages. ActiveState gives you the freedom to distribute your product with ease of mind. Gain competitive advantage and bring your applications to market faster with proven ActiveState technology.
