

ActiveState

Solutions Overview

From mission-critical applications to open source projects:

2 million developers and 97% of the Fortune 1000 rely on ActiveState.

“Not only is it reliable, scalable and enterprise-ready, ActivePerl saves CA development time and dollars.”

*Lawrence Backman,
Vice President QA, CA*

Development, management and distribution solutions for Perl, Python and Tcl

ActiveState is the world leader in enabling companies to develop, manage, and distribute applications with dynamic languages. Our [products and services for Perl, Python, Tcl](#) and other web languages, are used by over 2 million developers and 97% of the Fortune 1000 to build and run applications from mission-critical to open source projects. Our solutions help companies accelerate development productivity, minimize risk, and ensure compliance with open source use policies and distribution licenses.

Development Solutions

At ActiveState, we create tools for development in dynamic languages, helping you and your team:

- » **Code smarter:** Make development teams more productive and focused on quality
- » **Accelerate development:** Get applications to market faster
- » **Deploy quickly:** Meet tough, fast-paced development timelines

Commercial-grade language distributions

ActivePerl, ActivePython and ActiveTcl are the industry-standard, commercial-grade Perl, Python and Tcl distributions used by millions of developers around the world for easy installation and quality-assured code. From mission-critical applications to open source projects, our commercial-grade language distributions offer significant time savings over open source Perl, Python and Tcl for installing, removing, upgrading, and managing common modules.

Komodo IDE

Code smarter with ActiveState's award-winning, professional development environment for dynamic languages and web languages such as Python, Perl, PHP, Tcl, Ruby, JavaScript, CSS and HTML. Its sophisticated tools include a code editor, syntax checking and coloring, and a debugging tool that boost developer productivity and quicken development cycles.

[Perl Dev Kit](#) and [Tcl Dev Kit](#)

Accelerate productivity with essential tools for building and deploying Perl and Tcl applications featuring cross-platform wrapping and application builders for Windows, Mac OS X, Linux, Solaris¹, HP-UX¹ and AIX¹.

Developer Bundles

Our Pro Studio developer bundles provide everything you need to develop, debug and deploy professional Perl or Tcl applications in a single, easy-to-budget subscription, with a single license for all products and upgrades. The Pro Studio bundle offers the latest releases of Komodo IDE and either Perl Dev Kit or Tcl Dev Kit plus a full year subscription of Safari Books online.

1. Cross-wrapping to Solaris, HP-UX, and AIX requires a Business Edition, Enterprise Edition or OEM license for ActivePerl or ActiveTcl. Contact ActiveState for further details.

“We can’t understate how key ActiveTcl is to our product. That’s why our install splash screen says, ‘Powered by ActiveState’.”

*Tillmann A. Basien,
CTO, Toolbox Solution*

Management Solutions for Perl, Python and Tcl

Large organizations in financial services, aerospace & defense and government rely on ActiveState for peace of mind, to save developer time and to maximize application uptime. These organizations trust ActiveState’s best practices, advice and swift troubleshooting for critical applications built with dynamic languages.

Bank of America, Goldman Sachs, Credit Suisse, Boeing and GE Aviation and many others trust our enterprise-grade commercial support, Intellectual Property indemnification coverage, consulting services and expert training for:

- » Risk mitigation with Perl, Python and Tcl
- » Increased uptime for critical applications with priority access to dynamic language experts
- » On time delivery: focus on value-add development, not time-consuming language maintenance
- » Best practices advice and how-to guidance for language module usage and troubleshooting code problems
- » Better application performance with regular updates, bug fixes and version control
- » More productive staff trained and guided by ActiveState experts

Distribution Solutions for Perl, Python and Tcl

Based on a recent survey by Forrester Research, over 50% of enterprise developers are turning to dynamic languages as their choice for application development.

That’s why ISVs and systems vendors including Cisco, VMware, CA and Lockheed Martin have discovered the benefits of using open source dynamic languages in their applications to save development time and get to market faster. But developers are often unaware of the complex licensing behind each language and separate language modules.

That’s why they count on [ActiveState’s OEM solutions](#) for turnkey redistribution rights for ActivePerl, ActivePython and ActiveTcl. By relying on ActiveState to license applications properly, our OEM customers rest assured knowing they’re covered with indemnification against potential copyright infringement lawsuits. They use dynamic languages with confidence, knowing that they have access to on-demand, guaranteed support.
