

ActiveTcl[®]

END-TO-END TCL SOLUTIONS:

ACTIVETCL, TCL DEV KIT, KOMODO IDE FOR TCL,
TCL TRAINING AND CONSULTING

MILLIONS OF DEVELOPERS TRUST TCL FOR RAPID PROTOTYPING, SCRIPTED APPLICATIONS, GUIs, TESTING AND MORE. IT RUNS IN NUMEROUS CISCO ROUTERS AND IN VARIOUS NETWORK MANAGEMENT TOOLS WHERE TCL MAKE SURE DATA GETS TO EXACTLY WHERE IT BELONGS.

Because Tcl is an open source programming language, it can help cut up-front project costs. Despite all its benefits, Tcl alone may not help you meet your business goals.

Like most open source projects, Tcl isn't quality-assured or commercially supported. So it may not be safe for essential business applications that must run flawlessly around-the-clock. Don't let Tcl be a point of failure for internal support systems, costing you in lost revenue and reputation. Or worse, don't let it compromise your customers' mission-critical applications.

WORLD'S BEST TCL DISTRIBUTION

ActiveTcl is the industry-standard, commercial-grade Tcl distribution used by millions of developers around the world for fast, easy Tcl installation, and quality-assured code. Whether you're using Tcl for vital business applications or in open source projects, ActiveTcl offers worry-free implementation and significant time savings over open source Tcl when it comes to installing, removing, upgrading and managing common Tcl modules. ActiveTcl comes precompiled

Hemang Lavana
Software Engineer, Cisco

"Tcl has proven to be the best scripting language for our automated testing environment for over a decade now. The number of Tcl users within our organization has grown from a few engineers to over thousands. ActiveState has successfully managed to fill in the spot of providing Tcl support where Scriptics/Ajuba left off."

ActiveTcl®

for out-of-the-box installation and includes not only core Tcl and Tk, but dozens of popular extensions, the Tcl Package Manager (Teapot), and complete online documentation.

FAIL-SAFE ACTIVETCL FOR BUSINESS AND MISSION-CRITICAL APPLICATIONS

With ActiveState commercial-grade technical support and consulting for Tcl you no longer need to depend on overworked internal resources or unpredictable public Tcl communities for help.

ActiveTcl Enterprise Edition is designed for businesses with large Tcl deployments in essential, mission-critical applications that, when down, could cost your business in lost revenue and damaged reputation. Deploy Tcl with confidence knowing you're using the most secure, enterprise-grade builds for platforms like Windows, Linux, and Mac OS X, plus AIX, Solaris and HP-UX. You'll get priority access to core Tcl experts to ensure core applications are efficient, powerful and reliable. In addition, guaranteed Intellectual Property (IP) indemnification lets you focus on keeping mission-critical applications up and running and your business thriving.

ActiveTcl Business Edition is an affordable solution for small and mid-sized organizations that need fail-safe Tcl for business applications, but don't require advanced features like indemnification or enterprise-grade support. Business Edition customers trust ActiveState's guaranteed technical support and regular fixes and updates to ensure they're using the most secure, high-performance Tcl in their applications.

With both solutions, you'll benefit from access to Windows, Mac OS X and Linux, plus Solaris, HP-UX and AIX builds to work with Tcl on the platform that powers your business.

TURN-KEY TCL REDISTRIBUTION RIGHTS

ActiveTcl OEM Edition is an out-of-the-box solution for ActiveTcl redistribution rights. If you redistribute Tcl in enterprise software or hardware, ActiveTcl OEM Edition takes the worry and complexity out of open source licensing. It immediately guarantees assurance and eliminates all legal risk that goes along with distributing Tcl and modules in commercial applications.

FASTER, EASIER TCL DEVELOPMENT

ActiveState's Tcl Dev Kit is made up of essential tools that make it easier for your team to create, build and deploy Tcl applications on various platforms. Understand complex code at a glance with a visual guide to component relationships and kill bugs faster with a cross-platform graphical debugger.

Komodo IDE is ActiveState's award-winning, professional development environment for Tcl and other dynamic languages and open technologies. Its sophisticated tools include a code editor, syntax checking and coloring, debugging tools and more. With Komodo IDE's new, improved features for team development, developers can share the joy, and the workload!

ActiveTcl®

COMMUNITY-FRIENDLY TCL

ActiveTcl Community Edition is a free, ready-to-install Tcl distribution for Windows, Linux and Mac OS X. It's ideal for community developers or open source projects that are not business or mission-critical. It does not include access to builds for HP-UX, Solaris, or AIX (only available in higher editions). Support for ActiveTcl Community Edition is only offered through the community and forums.

EXPERT TRAINING AND CONSULTING FOR TCL

Get the maximum benefit from your ActiveState solutions by providing your developers with expert training in Tcl. Our customized training programs for Tcl help increase productivity, deliver powerful systems and assist in professional development. Trust ActiveState experts to make sure your projects are delivered on time, on budget with Tcl consulting services such as best practices in deploying dynamic languages, high-level application design and deliver customized builds for your needs and processes.

ActiveState®

ABOUT ACTIVESTATE

ActiveState believes that enterprises gain a competitive advantage when they are able to quickly create, deploy and efficiently manage software solutions that immediately create business value, but they face many challenges that prevent them from doing so. The company is uniquely positioned to help address these challenges through our experience with enterprises, people and technology. ActiveState is proven for the enterprise: more than two million developers and 97 percent of Fortune 1000 companies use ActiveState's end-to-end solutions to develop, distribute, and manage their software applications written in Java, Perl, Python, Node.js, PHP, Tcl and other dynamic languages. Global customers like Cisco, CA, HP, Bank of America, Siemens and Lockheed Martin trust ActiveState to save time, save money, minimize risk, ensure compliance and reduce time to market.
