

OEM LICENSING

REDISTRIBUTE OPEN SOURCE
LANGUAGES WITH FAILSAFE LICENSING

ELIMINATE LEGAL RISK

ActiveState's license overrides all individual open source licenses

REDUCE APPLICATION RISK

Languages are security scanned & backed by SLA-based support

ENSURE COMPLIANCE

3rd-party packages reviewed & open source license compliance ensured

OBTAIN INDEMNIFICATION

Up to \$5,000,000 coverage for lawsuits

COMMERCIAL SUPPORT

Phone and email support channels, backed by a guaranteed SLA

MULTIPLE LANGUAGES

OEM licenses cover Perl, Python, Go and/or Tcl

STANDARDIZATION

Standardize on versions that are 100% compatible with community open source languages

Turnkey Redistribution for Open Source Languages

Organizations redistribute open source libraries with their products. However, this raises two issues:

Licensing – you need to untangle your open source licenses to avoid IP infringement lawsuits. This can be especially complex when multiple packages/modules – each with their own license – are involved.

Support – you need to adhere to customer SLAs, but the open source community doesn't. How can you ensure access to timely support?

Most organizations use valuable employee time and resources to solve licensing and support issues. ActiveState offers a better solution.

ELIMINATE LEGAL RISK

ActiveState's OEM Edition provides organizations with turnkey, failsafe licensing, commercial support and indemnification for products that embed Perl, Python, Go and/or Tcl functionality.

ActiveState's language distributions are carefully curated to remove all improperly licensed code and resolve any licensing conflicts. While this significantly reduces legal risk for ActiveState's customers, the Enterprise OEM license directly protects your company from legal exposure since your company is no longer responsible for licensing all the individual open source components of a language distribution. ActiveState's Enterprise agreements override the open source licenses and offer the warranties, guarantees and indemnification large enterprises need, so you can deploy your code worry-free.

The OEM license also provides you with royalty-free distribution rights. This kind of out-of-the-box licensing saves you time, resources and the headaches that accompany managing license compliance on your own, and may be a better alternative to investing in periodic open source audits.

OEM LICENSING

REDISTRIBUTE OPEN SOURCE LANGUAGES WITH FAILSAFE LICENSING

OEM CHOICE FOR REDISTRIBUTING OPEN SOURCE LANGUAGES

ActiveState's OEM license is the key to easing customer and partner worries. It's why customers like **Cisco**, **VMWare** and **CA** rest assured. They know they're covered with on-demand, guaranteed support and indemnification against potential copyright infringement lawsuits.

ON-DEMAND COMMERCIAL SUPPORT

Get priority access to ActiveState's experts to help your development team keep projects on track. ActiveState's OEM customers get unlimited incidents, priority access to core open source language experts, guaranteed response times, and fixes delivered directly to you.

Plus, resolve your team's development issues privately, not on public forums. ActiveState's open source experts can help from troubleshooting & emergency in-production coverage to advice on migration efforts.

TAKE QUALITY PRODUCTS TO MARKET FASTER

ActiveState's open source language distributions are fully tested and quality assured by core Perl, Python, Go and Tcl experts. They address module-level dependencies and eliminate vulnerabilities. Regular updates and fixes guarantee that you're always working with the latest, most secure release.

Your staff can spend their time developing and delivering quality products and rely on our dynamic language experts for building, testing and maintaining open source language distributions.

It's very important to us that we don't have open source licensing problems, which is why we use ActivePerl OEM. We estimate that it saves us about 50K Euro per year on support and possible missed deals."
